

## Lapidary and Fine Metals Summer 2024 2nd Session

In this 4-credit course students will learn how to cut slabs from rough natural stones and create cabochons to then use in projects created in brass, copper, and sterling silver. The safe and proper use of lapidary equipment will be covered including but not limited to a slab saw, trim saw, flat lapping machine, and cabochon machine. In addition, students will learn foundational metalsmithing skills to create projects that will incorporate their cabochons. These skills include: drilling, sawing, high temperature torch soldering, forming, and polishing techniques. Students will participate in readings, class discussions, and a peer critique.

Summer 2024 CRN: 40037  
4-credits  
Academic details: Visual Arts  
Path  
Fields of Study: Visual Arts  
Fees: \$120 material fee; \$50  
mandatory studio fee  
Class will meet on Saturdays  
and Sundays noon-6, weeks 6-9
