

Vascular Plant List:
Mima Mounds
Thurston County, Washington

List covers plants found in the mima Mounds Natural Area Preserve, about sixteen miles southwest of Olympia.
List compiled by Reid Schuller, date unknown.

133 species (102 native, 31 introduced)

Coordinates: 46.897452°, -123.049999°

Key to symbols:

* = Introduced species.

+ = Species is represented by two or more subspecies or varieties in Washington; the species in this list has not been identified to subspecies or variety.

! = Species is not known to occur near this location based on specimen records in the PNW Herbaria database, and may be misidentified.

Numeric superscripts after a scientific name indicates the name was more broadly circumscribed in the past, and has since been split into two or more accepted taxa in Washington. The possible accepted taxa names for Washington are provided after the species list, keyed by superscript.

Accepted names and family classifications are obtained from the [Washington Flora Checklist](#) and the [Revised Flora of the Pacific Northwest](#), managed by the [University of Washington Herbarium at the Burke Museum](#). Relevant synonyms are indicated in parentheses.
