## Interdivisional Schools

- Program teams self-select where they see ٠ themselves on the color-wheel. Programs, courses, ILCs, internships are located within one, two, or all three Schools, depending on their themes and content as determined by faculty. Paths are clustered within schools (or "SuperCats").
- Each School includes wraparound advising, ٠ capstone, and equity structures appropriate for its academic areas.
- Each School has Toolboxes for lower-credit • skills acquisition.

• The model highlights interdisciplinarity and integrates skillsbased, lower credit options geared towards getting capstones and certificates for workforce development, grad schools etc.
