

Women In Science at Evergreen (W.I.S.E.)

Women in Science at Evergreen (WISE) is an organization dedicated to helping woman-identified science students at The Evergreen State College create community around the common goal of reducing unconscious bias and discrimination toward women scientists. Weekly luncheons, as well as quarterly panel discussions featuring diverse women scientists will provide the opportunity to discuss the challenges and celebrate the achievements of women in scientific fields. Students will also be able to engage in professional networking and cross-discipline discussions of their research and/or educational goals.

While WISE is an organization devoted to supporting woman-identified students in sciences at Evergreen, those who do not identify as binary or gendered but who are directly impacted by systemic misogyny in the sciences, along with all other under-represented and oppressed groups, are invited. Indeed, all students interested in advancing an equitable and healthy environment in the sciences are welcome.

Interested in joining W.I.S.E. ? Contact our coordinator at: calabril@evergreen.edu or join us on the first Wednesday of every month in Lab 1 Room 3033 from 1-2pm; visit our facebook group at: Women in Sciene at Evergreen (W.I.S.E) at : <https://www.facebook.com/groups/1786630411613091/#>
