

The world beneath the waves is one wholly different from our own.

Land, Sky, Sea & The Seal In-Between

A seal's eyes are like a siren's song, beautiful, haunting and inexorable.

The seal is a creature that unites our world with that of the Other.

Legends of selkies and descendants of seals have long drawn the people of Ireland and Scotland's rugged western shores into the realm of the unknown, whether it be the depths of the ocean, the mystery of the Otherworld, or the deep and unfathomable gaze within a seal's eyes.

From epic tales of gods and defeat, to strange peoples from the Norwegian coast, the seal remains a creature between worlds, ever shifting in their liminal existence between land, sea and sky.

The Otherworld remains as mysterious as these enshrouded isles on the horizon.
