and tie the shoe string or
ROPE

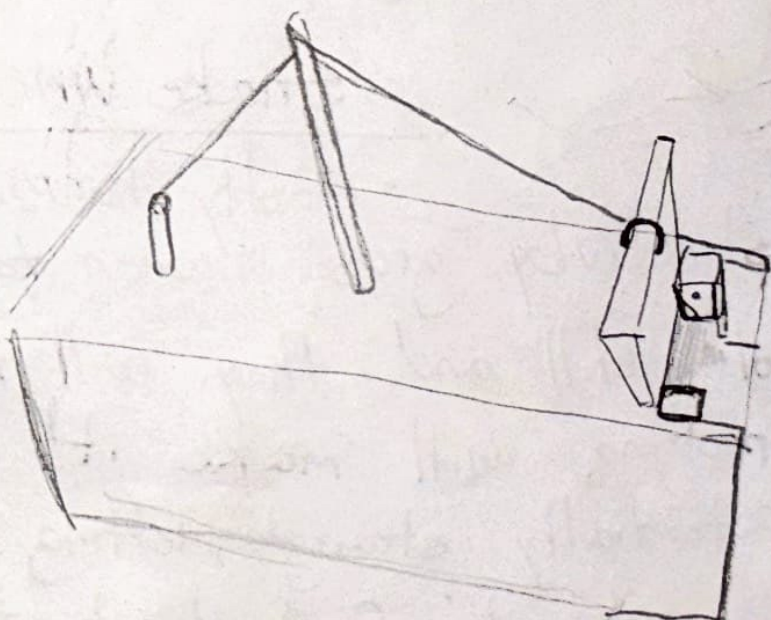

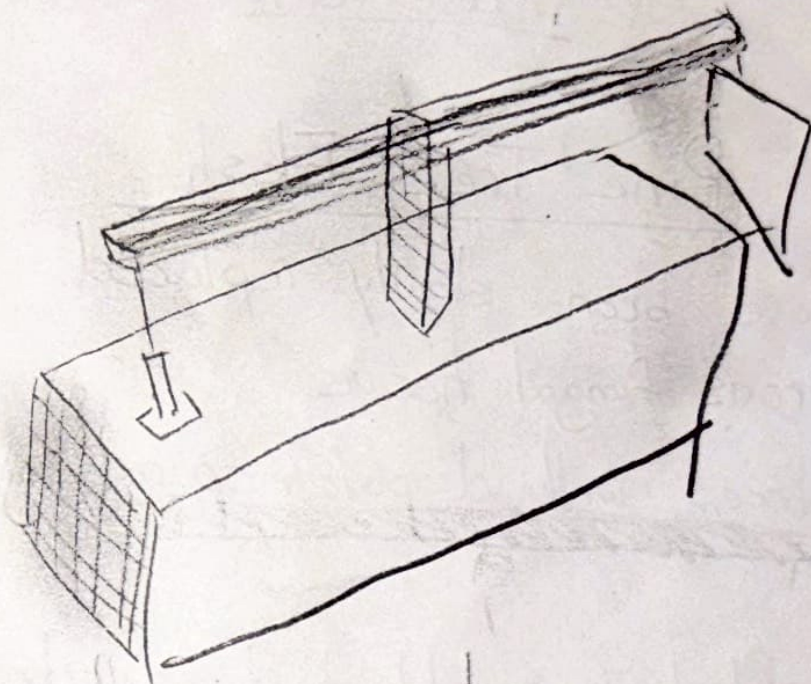

SQUIRREL TRAP

HUNGRY? ↓

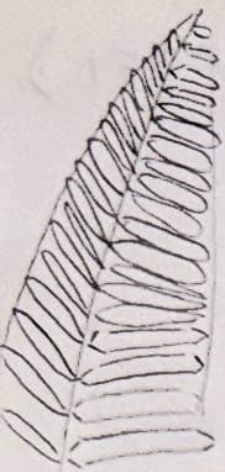

#1 MAKE BOX, 4 PANELS (BIG ENOUGH
WOOD GLUE OR NAIL FOR SQUIRREL)
TOGETHER

#2

Sword fern

- Heat sensing, Avoid walking near!
- Will dig into flesh and suck blood
- Can only safely remove with fire
- Ripping off can lead to fatal infection.

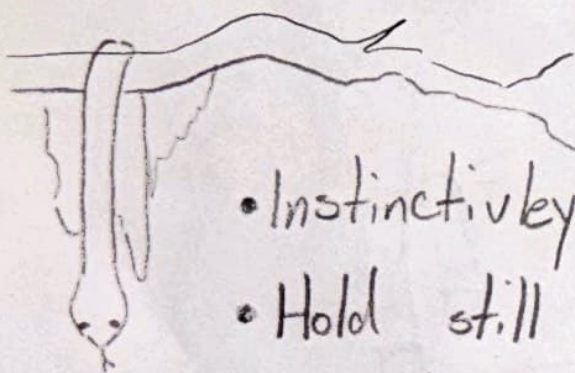

Pine Tree Flesh

- Trees have been slowly replaced with porous fungal tissue.
- Injured trees will dispatch paralyzing spores.
- However flesh is edible, tasty + nutrient dense after cooking or drying.

Snake vine

- Mostly harmless
- Instinctively grabs when touched
- Hold still and they will let go.
- Moving will make it worse
- Can potentially strangle, letting the Corpse's nutrients feed the host tree.
